

When and Where: Appointments are available at any of our (3) convenient, accredited cardiac testing centers:

- **The Indiana Heart Hospital Testing Center (North)**
The Indiana Heart Hospital Campus
8075 N. Shadeland Ave, Suite 140
Indianapolis, IN 46250
Phone (317) 621-8565
- **The Indiana Heart Hospital Testing Center (East)**
Community Hospital East Campus
1400 North Ritter Ave, Suite 500
Indianapolis, IN 46219
Phone: (317) 355-1234
- **The Indiana Heart Hospital Testing Center (South)**
Community Hospital South Campus
1402 East County Line Road, Suite 2200
Indianapolis, IN 46227
Phone: (317) 887-7880

To Schedule an Appointment: Select a location that's convenient for you and call that phone number listed above.

Who is Eligible: Students that are at least 11 years of age. Students under 18 years must have a parent or legal guardian present to sign the consent for testing.

Payment: The cost of the screening is \$25.00 per athlete. Payment must be made at time of service. Cash, credit card or personal check is accepted. Please make check payable to: Community Heart and Vascular Physicians.

Why should my student athlete be screened: This cardiovascular screening is designed to evaluate the potential risk of sudden death from a cardiac related abnormality such as Hypertrophic cardiomyopathy (also known as IHSS/HC/HOCM) and Prolonged QT syndrome. It is important to understand that this special screening is limited in nature and **does not** evaluate for all potential cardiovascular conditions that could exist now or in the future including valvular abnormalities or coronary artery disease. This examination should not replace a complete cardiovascular examination if indicated by symptoms, murmur or your physician. If the screening results are abnormal you should immediately seek follow up care with your personal physician. This screen is limited to only cardiovascular care and does not evaluate for non-cardiovascular issues.

Examination process: The screening is a non-invasive procedure consisting of a 2 D ultrasound and a resting 12 lead ECG. It will take approximately 20 minutes to complete. The student will be asked to remove all clothing from the waist up in order for the ultrasound and ECG to be completed. Parents are encouraged to be in the exam room.

Results: The results will be mailed to the student's home within 5-7 business days of the examination. It is the responsibility of the student and parents to seek any follow up treatment needed from their personal physician.
